PORTLAND CEMENT WORKS, NORTHFLEET, KENT.—Messrs. ROBINS and CO. solicit the attention of their Friends and the public to their superior Cement, considered to be the great improvement in the manufacture thereof during the past year, and to which they are constantly adding, as their premises with which they have so long been favoured.—Orders received at the Works, and at Great Scotland-yard, Whitehall. March, 1853.

ATKINSON'S CEMENT, so long known and esteemed in London, for plastering purposes, is a quick setting cement, and is exceptionally valuable for internal work. Sold by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster, and Basinghall-street, Liverpool.

KEENE'S and PARIAN CEMENTS and FRENCH PLASTER for internal uses.—These well known hard cements dry quickly, and can be painted upon within a few hours. Made and sold by JOHN BAZLEY WHITE and SONS, Millbank-street, Westminster.

PORTLAND CEMENT is the cheapest, because the best Cement for external uses. As a stucco, it requires no colouring; does not vesicate, and is not affected by frost.—Add a quarter for brick work. It may be mixed with three to four parts of sand; and, for concrete, it will carry ten to twelve times its volume of sand and gravel.—Manufactured by JOHN BAZLEY WHITE and SONS, 17, Millbank-street, Westminster, and Basinghall-street, Liverpool.

PORTLAND CEMENT.—JAMES WESTON, having commenced manufacturing the above Cement, begs to inform the trade in general that he can supply them with any quantity they may require, either at his Works, Mill-wall, Poplar; St. Andrew's Wharf, East-street, Blackfriars; or Middle Scotland-yard, Westminster, Manufacturer of Roman, Lias, and Medina Cements, French and English Plaster, &c.

PORTLAND CEMENT.—The difficulty of procuring this valuable Cement of uniform power and strength has hitherto prevented its more general use. Contractors and Builders will find that these two important qualities may be depended on with the greatest certainty in that manufactured by C. J. HILTON, at his Roman and Portland Cement and Plaster of Paris Works, Faversham, Kent, at which place, as also at his Depôt in London, 1, Upper Thames-street, City, and Great Scotland-yard, Westminster, orders can now be received to any extent.

PORTLAND CEMENT, in Casks of Four Imperial Bushels QUANTITY NOT WEIGHT, BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

6, South Wharf, Paddington.

PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the trade the above superior CEMENT, being of uniform colour and quality in consideration more before obtained in Portland Cements. It possess extraordinary hydraulic qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn sour, or crack. It is mixed with which its eminent hydraulic properties stamp it at once as the first cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by R. GREAVES, Esq. at his Works, near the River Avon, and sent to all parts of the kingdom per boat or rail, at a reduced price to the trade.

PATENT PORTLAND and ROMAN CEMENTS.—WINKFIELD, BELL, and CO. of East Greenwich, Kent, having now completed some heavy contracts, are prepared to execute orders to any extent for either of the above Cements, which they are quite prepared to prove exceed any shown in their cementitious qualities at present manufactured. Many highly respectable references can be given where their Cements have been successfully used. Orders addressed to their Works will be punctually attended to, and terms moderate. Where quantities are used a considerable saving price will be made.—Agent at Southampton, Mr. GEORGE SHARPE, Union Wharf.

PARIAN CEMENT for internal use, to be PAINTED IN A FEW HOURS, AND PAPERED WITHIN A COUPLE OF DAYS.—CHARLES FRANCIS and SONS, Patentees, Nine Elms, London.

MEDINA (ROMAN) CEMENT.—The material of which this cement is made is obtained in the Isle of Wight. It has all the properties of the Sheppy Stone, but is much better adapted to engineering work, from the rapidity with which it sets and hardens under water. It has been used at the great Break-water at Charlestown, in a similar work at Alderney; and at Dover new pier, to unite the masonry. The foundations of the centre pier of the Tubular Bridge at Menai Straits is laid in Medina Cement. A new groyne at Sandown Bay, Isle of Wight, has been constructed of no other material but this cement and the shingle. The work extends 300 feet into the sea, and is exposed to the most violent action of the Channel, in which the heavy former construction had been repeatedly washed away. The inconvenience of the varied qualities of Roman Cement are superseded by the use of this improved manufacture.

CHAS. FRANCIS and SONS, Nine Elms, London; or West Medina MILL, Newport, Isle of Wight.

Agent for Southampton, R. L. FLUDER, American Wharf.

PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.

As used at St. George's Hospital, Hyde Park Corner.

JOHNS and CO. having effected some important improvements in the manufacture of their very useful material, are thereby offer it to the notice of the Trade and the Public generally, as possessing every advantage over the common Lime Wash or Water Colour for STUCCO or BRICK WORK. It is a Stone Colour, but may be tinted to any other.—DOES NOT WASH OFF.—is perfectly dry in twenty-four hours, and, being a mineral substance, is materially adapted for Railway Stations, Dead Walls, Warehouses, Schools, Prisons, &c. One cwt. will cover 300 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its suitableness for internal as well as external surfaces, is placed before all other materials of the kind; it has no caustic qualities; may be painted or papered in a few days; never blisters, cracks, or vegetates; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained on application to the Sole Agents, PHILIP HARE and Co. at the Warehouse, 28, Great-yard, Upper Thames-street.
